SUMMARY

I am a student in the College of Computer Science. I studied the basics of programming, data structures, object-oriented programming, and algorithms in C++. I also learned website programming through courses and solved Problem Solving

PROFESSIONAL EXPERIENCE

I am making a front end that responds to all screens.

I create a front-end that is high-performance, easy and smooth for the user.

PROJECTS

Netflix Clone Movie App

Solo project built with **React.js**, **Tailwind CSS**, and **Firebase**.

Fetches movie data from the **TMDb API**, implemented **user authentication**, and used **React Router** for navigation. 🔗 [Live Demo](#) | [GitHub Repository](#)

E-Commerce Website

Solo project using **HTML**, **CSS**, **JavaScript**, **Bootstrap**, and **Swiper.js**.

Built a responsive online store with **shopping cart functionality**, including add/remove features.

Fetches product data from a local **JSON file** simulating an API.

🔗 [Live Demo](#) | [GitHub Repository](#)

Weather App

Solo project built with **HTML**, **CSS**, and **JavaScript**.

Fetches real-time weather data from a public **Weather API** and displayed it dynamically based on user input. 🔗 [Live Demo](#)

Exclusive E-Commerce

Solo project built with **React.js**, **Redux**, **Tailwind CSS**, **CSS**, and **Firebase**. Implemented shopping cart functionality, form validation using **Formik** and **Yup**, and user authentication via **Firebase**.

Used a **Fake API** to simulate product data and managed global state with **Redux**. [🔗 Live Demo](#) | [GitHub Repository](#).

Tiba Care

Full-stack medical dashboard project built individually using **React.js**, **Tailwind CSS**, **CSS**, and **EmailJS** on the frontend, with a **Spring Boot** backend and **PostgreSQL** database.

Implemented **JWT-based authentication**, secure **dashboard routing**, and full **CRUD functionality** (add, update, delete) using **Axios** for client-server communication.

Integrated **SweetAlert** for interactive user feedback and **EmailJS** for automated email sending. [🔗 Live Demo](#) | [GitHub Repository](#).

SKILLS

React Js , Redux Js , Tailwind Css

Bootstrab , Firebase , Gsap

Js , Css , Html

Git & Github , Vercel

EDUCATION

I am still a student in the Faculty of computer Science

Computer Science University

Sep 2023- Sep 2027
